CLUSTER. THE BUSTER[®] SYSTEM

Killgerm
www.killgerm.com

**NO MORE MESS!
NO MORE BUZZING!
NO MORE CLUSTER FLY PROBLEM!**

This simple and economical device from Powder Trap[®] is a proven solution to eliminate your cluster fly problem. **Place one trap in each problem window and the Cluster Buster[®] system will break the entry-exit cycle by capturing flies in QuickSand[®], which rises as they sink, causing rapid dehydration.** The Cluster Buster also prevents flies from refreshing the pheromone trails that lead even more flies back in.

The first set of traps last up to 2 years on average, 3-4 years for the follow up.

Killgerm Chemicals Limited, PO Box 2, Ossett, West Yorkshire, WF5 9NA.
